Re: Nudelman & Son, Inc.  
Preliminary Assessment  
ORD # 027744093

The Department of Environmental Quality (DEQ) has completed a preliminary assessment of Nudelman & Son Inc. under an agreement with the U.S. Environmental Protection Agency (EPA). A copy of the report with the attachments is enclosed. A preliminary assessment is an initial assessment of available information about a site to establish whether there are sufficient human health and/or environmental concerns to warrant a more extensive review.

Based on the preliminary assessment, DEQ recommends that no further action be performed under the EPA Superfund program. However, it is recommended that the EPA TSCA program follow-up on the removal of the transformer containing PCBs. There is also some concern with regard to the low level of contamination and the capacitors outside the fence near the access road. DEQ does not anticipate further action at this site unless additional information becomes available which warrants investigation. Please feel free to submit information to us which you believe would make our report more complete.

If you have any questions, please call Michael Zollitsch of my staff at (503) 229-6931.

Sincerely,

David St Louis, P.E., Manager  
Site Assessment Section  
Environmental Cleanup Division
